

Michael Moore supports Conyers/Kucinich health care plan HR 676

"Thank you Dennis Kucinich for running for President," says award-winning filmmaker **Michael Moore** as he endorsed the [Conyers/Kucinich universal health](#)

[insurance bill \(HR 676\)](#) currently being considered by the U.S. House of Representatives. And, "thank you," Moore continued, for "at each of the debates, bringing up this very important issue and requesting that our fellow Democrats state their specific positions of how we're going to bring health care to all Americans and remove the profit incentive from health care. It has to be removed, and thank you for saying that over and over again."

Californians: Call your legislators and the Governor today and ask them to pass SB 840, the California equivalent of the Conyers-Kucinich health care plan. Sheila Kuehl's SB 840 is the *ONLY* bill before the California legislature that will give universal, single-payer, *not-for-profit* health care to all Californians. Other California health care plans *are for the benefit of the insurance carriers.*
